Datasheet for 025-0340 Llama IgG1 isotype control Peroxidase

Overview

Description:	Llama IgG1 Isotype Control Peroxidase Conjugated - 025-0340
Item No.:	025-0340
Size:	100 µg
Origin:	Llama

Product Details

Background:Comparative studies of old world camelids (Camelus bactrianus and Camelus dr new world camelids (Lama pacos, Lama glama and Lama vicugna) have shown t only immunoglobulins represent between 35% - 70% of total IgG in the sera of a antibodies are homodimers of heavy chains that lack the CH1 domain of conver antibodies and therefore do not interact with light chains, exhibiting a lower mo ~100 kDa. In llama and other species of camelids, these heavy-chain-only immu belong to the IgG2 and IgG3 subclasses.All gamma chain camelid antibodies exhibiting the more conventional assembly two heavy chains with molecular weight ~150 kDa, belong to the IgG1 subclass.	that heavy-chain- all species. Such ntional olecular weight inoglobulins y of two light and
Synonyms:Llama IgG1 isotype, Llama IgG1 subclass isotype, Llama IgG1 Peroxidase Conjug HRP, Llama isotype control	ated, Llama IgG1
Species of Origin: Llama	
Conjugate: Peroxidase (HRP)	
Format: lgG1	
Type: Native Protein	

Target Details

Purity/Specificity:Llama IgG1 isotype control has been prepared from llama serum by multiple chromatography
steps using a combination of protein A and protein G chromatography. Coomassie stained SDS-
PAGE of non-reduced unconjugated llama IgG1 shows a band of ~150 kDa whereas the reduced
form exhibits ~55 kDa (heavy chain) and ~25 kDa (light chain). No bands corresponding to
unconjugated llama IgG2 or IgG3 are observed. Peroxidase Conjugated Llama IgG1 was proven
by Dot Blot.

Application Note:	Llama IgG1 HRP Conjugated isotype control can be utilized as a control or standard reagent in Flow Cytometry, ELISA, and western blotting experiments where determination of sample isotype is important.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	User Optimized
FC:	User Optimized
WB:	User Optimized

Application Details

Formulation

Physical State:	Lyophilized
Concentration:	1.0 mg/mL by UV absorbance at 280 nm
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.01% (w/v) Gentamicin Sulfate. Do NOT add Sodium Azide!
Stabilizer:	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
Reconstitution Volume:	100 μL
Reconstitution Buffer:	Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition:	Ambient
Storage Condition:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.
