

#### Datasheet for 610-445-043

# Mouse IgG3 (Gamma 3 chain) Antibody DyLight™ 800 Conjugated

### **Overview**

Description:	Rabbit Anti-Mouse IgG3 (Gamma 3 chain) Antibody DyLight™ 800 Conjugated - 610-445-043				
Item No.:	610-445-043				
Size:	100 μg				
Reactivity:	Mouse				
Host Species:	Rabbit				

### **Product Details**

**Background:** Anti-Mouse IgG3 DyLight 800 Antibody generated in rabbit detects reactivity to Mouse IgG3

(Gamma 3 chain). Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. IgG3 comprises almost 10% of the IgG subclass and has a high affinity for binding to the Fc receptor of phagocytic cells. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-

species source and fragment composition.

Synonyms: Rabbit Anti-Mouse IgG3 (Gamma 3 chain) DyLight 800™ Conjugated Antibody, Rabbit Anti

Mouse IgG3 Antibody DyLight 800™ Conjugation

Host Species: Rabbit

Specificity: IgG3

Conjugate: DyLight™ 800

Clonality: Polyclonal

Format: IgG

**F/P Ratio:** 2.0

## **Target Details**

Reactivity: Mouse

Immunogen: Mouse IgG3 heavy chain

**Purity/Specificity:** 

This product was prepared from monospecific antiserum by immunoaffinity chromatography using antigens coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum, Mouse IgG and Mouse Serum. Minimal cross reactivity was noted against other Mouse immunoglobulin classes or subclasses.

# **Application Details**

Application Note:	The emission spectra for this DyLight™ conjugate match the principle output wavelengths of most common fluorescence instrumentation. This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
FLISA:	>1:20,000
IF:	>1:5,000
WB:	>1:10,000

### **Formulation**

Physical State:	Lyophilized			
Concentration:	1.0 mg/mL by UV absorbance at 280 nm			
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2			
Preservative:	0.01% (w/v) Sodium Azide			
Stabilizer:	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free			
Reconstitution Volume:	100 μL			
Reconstitution Buffer:	Restore with deionized water (or equivalent)			

# **Shipping & Handling**

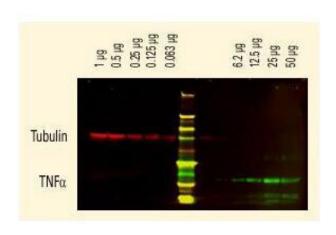

<b>Shipping Condition:</b>	Ambient
Storage Condition:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

#### **Western Blot**

DyLight<sup>™</sup> dyes can be used for two-color Western Blot detection with low background and high signal. Anti-tubulin was detected using a DyLight<sup>™</sup> 680 conjugate. Anti-TNFa was detected using a DyLight<sup>™</sup> 800 conjugate. The image was captured using the Odyssey<sup>®</sup> Infrared Imaging System developed by LI-COR.
