Datasheet for 614-4904

Swine IgG F(ab')2 Antibody Texas Red™ Conjugated

Overview

Description:	Rabbit Anti-Swine IgG F(ab')2 Antibody Texas Red™ Conjugated - 614-4904
Item No.:	614-4904
Size:	2 mg
Reactivity:	Pig
Host Species:	Rabbit

Product Details

Background:	Anti-Swine IgG F(ab')2 Texas Red™ Antibody generated in rabbit recognizes the dimeric Fab
	portion of the swine IgG molecule. Swine IgG F(ab')2 is a proteolytic fragment of
	immunoglobulin G (IgG) obtained by limited digestion with the enzyme pepsin under controlled
	conditions of temperature, time and pH. F(ab')2 molecules lack the Fc portion of IgG and
	therefore receptors that bind swine IgG F(c) will not bind swine IgG F(ab')2 molecules.
	Secondary Antibodies are available in a variety of formats and conjugate types. When choosing
	a secondary antibody product, consideration must be given to species and immunoglobulin
	specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-
	species source and fragment composition. This Anti-Swine IgG F(ab')2 antibody is conjugated to
	Texas Red™.

Texas Red™ Conjugated Antibody, Rabbit Anti-Swine IgG Fab2 Fragment Antibody Texas Red™ Conjugation

Host Species: Rabbit

Specificity: IgG F(ab')2

Conjugate: Texas Red®

Clonality: Polyclonal

Format: IgG

Rabbit Anti-Swine IgG F(ab')2 Texas Red™ Conjugated Antibody, Rabbit Anti-Swine IgG Fab2

Target Details

Synonyms:

Reactivity: Pig

Immunogen:	Swine IgG F(ab')2 fragment
Purity/Specificity:	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Swine IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum, Swine IgG F(ab')2 and Swine Serum. No reaction was observed against Swine Fc.

Application Details

Application Note:	This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
FC:	1:500 - 1:2,500
FLISA:	1:10,000 - 1:50,000
IF:	1:1,000 - 1:5,000

Formulation

Physical State:	Lyophilized
Concentration:	2.0 mg/mL by UV absorbance at 280 nm
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.01% (w/v) Sodium Azide
Stabilizer:	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
Reconstitution Volume:	1.0 mL
Reconstitution Buffer:	Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition:	Ambient
Storage Condition:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
