

Datasheet for KOA0108**Rat Alk Phos SABC IHC Detection Kit****Overview**

Description:	Rat Specific Alk Phos SABC Detection Kit - KOA0108
Item No.:	KOA0108
Size:	1 Kit
Reactivity:	Rattus (Rat)
Host Species:	Rabbit

Product Details

Background:	Rat IgG Specific Alkaline Phosphate Streptavidin-Biotin Complex Immunohistochemistry Detection Kit is a streptavidin-biotin immuno-enzymatic antigen detection system. This system involves the sequential incubation of the sample with an unconjugated primary antibody specific to the target antigen, a biotinylated secondary antibody that reacts with the primary antibody, enzyme-labeled streptavidin, and chromogen substrate. Rat Specific AP/DAB (ABC) Detection Kit includes reagents specifically designed for the use in the analysis of antigens in IHC and other immunodetection assays. The provided protocol includes steps for immunohistochemical analysis with normal rabbit serum blocking reagent, biotinylated secondary antibody, an enzyme-labeled streptavidin, and a chromogenic agent.
Synonyms:	Alkaline Phosphatase/3,3'-diaminobenzidine Kit Assay, StreptAvidin-Biotin Complex, Alkaline Phosphatase Conjugated Rat Kit Assay, Anti-Rat IgG antibody, Rabbit anti-Rat IgG antibody, colorimetric staining, immunohistochemistry staining
Host Species:	Rabbit
Conjugate:	Alkaline Phosphatase (AP)
Clonality:	Polyclonal
Detection Kit Type:	Immunohistochemistry Kit

Target Details

Reactivity:	Rattus (Rat)
Relevant Links:	<ul style="list-style-type: none">KOA0108 protocol

Application Details

Application Note:	This kit is ready to use and no dilution is needed. See kit insert for details. Useful for Immunohistochemistry.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
IHC:	User Optimized

Formulation

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store at 4°C for 12 months. Avoid freezing. See kit insert for complete instructions.
Expiration:	Expiration date is one (1) year from date of receipt.
